Advanced Automated Administration with Windows PowerShell (10962B)

Table of content:

1   Creating Advanced Functions

- Lesson 1: Converting a Command into an Advanced Function
- Lab A: Converting a Command into an Advanced Function
- Lesson 2: Creating a Script Module
- Lab B: Creating a Script Module
- Lesson 3: Defining Parameter Attributes and Input Validation
- Lab C: Defining Parameter Attributes and Input Validation
- Lesson 4: Writing Functions that Use Multiple Objects
- Lab D: Writing Functions That Use Multiple Objects
- Lesson 5: Writing Functions That Accept Pipeline Input
- Lab E: Writing Functions That Accept Pipeline Input
- Lesson 6: Producing Complex Function Output
- Lab F: Producing Complex Function Output
- Lesson 7: Documenting Functions by Using Comment-Based Help
- Lab G: Documenting Functions by Using Comment-Based Help
- Lesson 8: Supporting –WhatIf and –Confirm
- Lab H: Supporting –WhatIf and –Confirm

2   Using Cmdlets and the Microsoft .NET Framework in Windows PowerShell

- Lesson 1: Running Windows PowerShell Commands
- Lesson 2: Using the Microsoft .NET Framework in Windows PowerShell
- Lab: Using the .NET Framework in Windows PowerShell

3   Writing Controller Scripts

- Lesson 1: Understanding Controller Scripts
- Lesson 2: Writing Controller Scripts That Show a User Interface
- Lab A: Writing Controller Scripts That Display a User Interface
- Lesson 3: Writing Controller Scripts That Produce Reports

Lab B: Writing Controller Scripts That Produce HTML Reports

4   Handling Script Errors

- Lesson 1: Understanding Error Handling
- Lesson 2: Handling Errors in a Script
- Lab: Handling Errors in a Script

5   Using XML Data Files

- Lesson 1: Reading, Manipulating, and Writing Data in XML
- Lab: Reading, Manipulating, and Writing Data in XML

6   Managing Server Configurations by Using Desired State Configuration

- Lesson 1: Understanding Desired State Configuration

- Lesson 2: Creating and Deploying a DSC Configuration
- Lab: Creating and Deploying a DSC Configuration

7   Analysing and Debugging Scripts

- Lesson 1: Debugging in Windows PowerShell
- Lesson 2: Analysing and Debugging an Existing Script
- Lab: Analysing and Debugging an Existing Script

8   Understanding Windows PowerShell Workflow

- Lesson 1: Understanding Windows PowerShell Workflow
