

Cyber Security

Table of content:

Foundations

- Welcome to the Course
- The CIA Triad
- Identity and Access Management
- Identity Federation
- Security Governance: Policies, Standards and Procedures
- Security Governance: GDPR, HIPAA, PCI-DSS and Intellectual Property
- Cryptography
- Hashing and Digital Signatures

Network Security

- Introduction: OSI and TCP/IP
- Application and Transport Layers
- DNS (Domain Name System)
- The Network Layer
- The Link Layer
- Security Protocols: SSL/TLS, IPsec, VPNs, SSH
- NAT: Network Address Translation
- Firewalls
- Wireless Networks and Security

Cyber Attacks

- Password Attacks
- DoS and DDoS
- DNS Attacks
- Network Attacks
- Man in the Middle Attack
- Social Engineering

Web Application Security

- Web Application Architecture
- SQL Injection
- Blind SQL Injection
- Mitigating SQL Injection Attacks
- XSS: Cross Site Scripting
- Vulnerability Management

Malware:

- Introduction
- Viruses and Worms
- Trojans
- Spyware, Adware and Ransomware
- Logic Bombs and Rootkits
- Antimalware
